## maxon DC motors on the race track.

**Our first driven magazine for the year is here. Go around the track with Swiss racing star Nico Müller and learn how maxon DC motors and planetary gearheads work as hard as the drivers do on race day.**

In the first edition of driven magazine for 2014, we look at the car racing industry. Specifically Formula Renault 3.5 and the role of maxon DC motors in keeping these high powered cars on the track and ready to tackle different course conditions.

We delve into how autonomous vehicles will operate in the future and the fascination that the world has with flying cars. There is also a sneak peak at an amazing new application for brushless DC motors to be sent into space again. And this time it's not mars...

Available as a free download on the Google Play and Apple App stores.

Contact maxon motor Australia in our Sydney office for a free print version.
