16mm brushless DC motors now available online.

All maxon 16mm brushless DC motors are available to order online & ready in 11 working days.

The 16mm diameter brushless DC motors (or ECX 16 SPEED) have been optimised for high speeds (up to 120,000 rpm). Depending on the application requirements, there are various versions of the DC motors available: Standard, High Power, sterilisable (up to 2000 cycles), sensorless or with Hall sensors, or with ceramic bearings for high speeds. The 16mm dia. brushless DC motors in Standard and High Power versions were released in November 2016, representing more torque and better efficiency.

Configurable online, manufactured in 11 days and with detailed 3D product data available call maxon motor Australia on tel. +61 2 9457 7477.
