

Discontinuation of maxon EC19 DC motor and GP19 planetary gearhead.

With the introduction of the ECX 19 SPEED brushless DC motors, maxon are phasing out the EC 19 and Planetary Gearhead GP 19.

The EC 19 and the GP 19 M were officially introduced in 2014. They will be replaced with the brushless DC motors – the *ECX SPEED 19* series. Final orders will be received up to December 22, 2017 with last delivery scheduled for March 30, 2018.

The alternative is the brushless ECX range of DC motors. Configurable online, these brushless DC motors are sterilisable, have ceramic bearings and are available with or without hall sensors. With an ironless winding these DC motors have an exceptionally large speed range, high power, excellent control characteristics and are highly durable. Choose from matching gearheads and with the option to configure the electrical connection.

For more information on an alternative DC motor or for application assistance, please call maxon motor Australia on tel. +61 2 9457 7477.
