

New maxon motor catalogue

maxon motor have released the 2018/19 catalogue. Entitled “High precision drives and systems” the new catalogue theme is based on maxon motors focus on building complete drive systems including DC motors, gearheads, sensors and controllers.

maxon motor will continue to be the world’s leading supplier of high precision brushed and brushless DC motors and gearheads but also have expanded into cross-platform system solutions from a single source. In addition to the new capabilities expansion maxon have released a large range of new products. These include: A new square format 16mm brushless DC motor, 13mm and 16mm ECX high speed brushless motors, the new ECi-30 low cost high torque BLDC motor, an entire range of frameless brushless motors that are particularly suitable for wheel hub applications and robotic joint actuation, new encoders and various new motor control units. The first torque levels from a direct drive maxon motor at 1Nm have been achieved with the new 260W flat motor that is less than 40mm long and a series of motors with a hollow bore are handy for applications that require a passage for cables, air or light. Print versions and online e-paper versions have been released.
