

Strengthening the DC motor controller offering.

maxon are phasing out the servoamplifier mmc DES 70/10 4-Q-EC and replacing it with better and more cost-efficient technology.

maxon motors product portfolio range is constantly reviewed. Monitoring of the market, customer requirements and feedback, economic conditions, as well as advancements in technology serve as forces behind the introduction of new products and what is offered. This has contributed to the decision to phase out maxon's servoamplifier mmc DES 70/10 4-Q-EC DC motor controller. In its place maxon offer similar alternatives with additional functionalities at a lower price. Specific EPOS4 and an ESCON 70/10 DC motor controller are offered in place. For more information please call maxon motor Australia on tel. +61 2 9457 7477.
