July 15, 2019

Press Release

We are maxon.

From July 1, 2019 maxon dropped the word “motor” from its name.

maxon is evolving from a manufacturer of motors and components into a specialist for precision drive systems. Known simply as maxon from 1 July, the company is changing its corporate structure to position itself as a powerful group with a worldwide presence and the capability to respond to specific local demands. With a focus on five core markets - medical technology, aerospace, industrial automation, transportation & e-mobility and robotics. maxon drives are used wherever the requirements are particularly high, for example, in NASA’s Mars rovers, surgical power tools, humanoid robots and in precision industrial applications. maxon’s expertise beyond drive technology consists of mechatronics, battery management systems and software & cloud services. At maxon Australia, a fully integrated service is on offer with the introduction of Dr Carlos Bacigalupo who is an expert in controller integration, system analysis and configuration assistance.

For further information please contact maxon Australia tel. +61 2 9457 7477.
