Press Release

PMDC brushed right-angle motors from Parvalux.

Permanent magnet brushed DC right-angle geared motors that can incorporate other application components into the complete drive system.

A part of Parvalux's brushed geared motor range is the PM10 MWS, 180Vdc, 2rpm, 8.5Nm motor. With high starting torque these right angle geared motors are suitable for a vast range of applications in particular those exposed to high temperatures. Offering similar specs to the Baldour PMDC motor GP233020, Parvalux offer several levels of customisation from standard stock such as shaft variations, output flange options, various cable lengths, brakes, encoders, paint finishes and terminal boxes, through to fully customised solutions including the ability to incorporate other components from your application.

For further information please contact maxon Australia tel. +61 2 9457 7477.

The Swiss specialist for quality drives

maxon is a developer and manufacturer of brushed and brushless DC motors, as well as gearheads, encoders, controllers, and entire mechatronic systems. maxon drives are used wherever the requirements are particularly high: in NASA's Mars rovers, in surgical power tools, in humanoid robots and in precision industrial applications, for example. To maintain its leadership in this demanding market, the company invests a considerable share of its annual revenue in research and development. Worldwide, maxon has more than 3000 employees at nine production sites and is represented by sales companies in more than 30 countries.
