Press Release

maxon motor Australia - COVID-19.

Medical Industry prioritisation and emergency sector fast turnaround markets.

During the extraordinary and challenging times the COVID-19 virus has brought about, maxon motor Australia would like to extend our wishes of good health to all customers, staff and suppliers.

In response to the corona virus outbreak maxon group have established a task force to help address the many challenges including staff isolation, continuance of supply, logistics and most importantly the service and delivery to our important medical industry customers. maxon group supply high end medical products across a broad range of hospital applications, and most importantly at this time, life-saving medical ventilators. As such maxon have established a fast track for medical and associated critically important applications. We would like to ask any customers in this category that we have not already been in contact with and are experiencing hyperactivity on demand or forecasts, to please register this with our staff. maxon would like to prioritise raw material and production capabilities around medical applications first. Our supply chain and production sites are flexible, adaptable and reliable.

For more information or to get in touch contact maxon motor Australia tel. +61 2 9457 7477.

The Swiss specialist for quality drives

maxon is a developer and manufacturer of brushed and brushless DC motors, as well as gearheads, encoders, controllers, and entire mechatronic systems. maxon drives are used wherever the requirements are particularly high: in NASA's Mars rovers, in surgical power tools, in humanoid robots and in precision industrial applications, for example. To maintain its leadership in this demanding market, the company invests a considerable share of its annual revenue in research and development. Worldwide, maxon has more than 3000 employees at nine production sites and is represented by sales companies in more than 30 countries.
